5

Trent had a busy day ahead working with cattle in the world of livestock farming. He carefully planned his tasks to ensure everything was done efficiently.

First, he had to **do** his morning chores:

10

- **Do** the feeding of the cattle before the sun rose.
- **Do** the milking routine with precision and care.
- **Do** some repairs around the barn to keep the structure sound.

After the morning chores, it was time to **make**

15

some preparations:

- **Make** a plan for the cattle's grazing rotation each week.
- **Make** a list of supplies needed for the upcoming month.
- **Make** adjustments to the feeding schedule based on the cattle's health.

20

In the afternoon, Trent continued with more activities:

25 •**Do** a health check on each of the cattle to ensure they were thriving.

 •**Make** notes in his journal about the herd's progress.

 •**Do** the evening rounds to **make** sure all cattle are settled safely.

30 As the day's work transitioned into evening, Trent, an experienced hand in livestock farming, focused on more technical aspects of his craft.

 Trent began by conducting a more detailed health assessment of his cattle. He knew he needed to **do**
35 some specific tasks to ensure the herd's wellbeing:

 •**Do** blood tests on several cows to monitor their nutrient levels.

 •**Do** an analysis of the soil quality in the grazing fields to decide on necessary improvements.

40 •**Do** a review of the cattle's vaccination records to schedule future health checks.

 Having completed these assessments, Trent moved on to improving his farm operations, where he needed to **make** precise decisions:

45 •**Make** adjustments to the cattle's diet by consulting a nutritionist, ensuring optimal health and productivity.

50 •**Make** a detailed layout for the expansion of the barn, considering ventilation and space for additional livestock.

 •**Make** contact with a local veterinarian to discuss any concerns he had observed during his health checks.

55 In preparation for the next day, Trent meticulously planned the following activities:

 •**Do** the paperwork required for complying with livestock farming regulations, ensuring all documentation was up to date.

60 •**Make** strategic plans for breeding, utilizing genetic data to improve the herd's quality.

65 As the moon rose over the farm, Trent reflected on the day's accomplishments. His dedication to both the daily and technical aspects of livestock farming ensured that his cattle thrived and his farm prospered. With a thoughtful gaze over his domain, Trent was ready for another day on the path of raising healthy, productive cattle.
