

Activity I. Read the following text about an F1 car and fill in the blanks with the appropriate words from the list below:

aerodynamics, hybrid, sensors,

5 *lightweight, downforce, turbocharged,*

energy, suspension, rear

Formula One (F1) racing is a high-speed and competitive sport that involves specially designed single-seater cars. These cars are built to reach incredible speeds and maneuver through tight turns on the race track. Here is a short explanation of
10 how an F1 car works, using advanced English vocabulary to challenge a foreign student.

An F1 car is powered by a _____ power unit, consisting of a _____ internal combustion engine and an energy recovery system (ERS). The internal combustion engine converts fuel into _____ that is used to drive the _____ wheels, while the ERS harnesses energy that is usually lost during braking
15 and converts it into a power boost that can be deployed during the race.

The _____ of an F1 car play a crucial role in its performance. The car is designed with a low, sleek profile and wings at the front and rear that generate _____, which helps to keep the car firmly planted on the track at high speeds. Additionally, the car's _____ system is specially engineered to maintain maximum
20 grip and stability, even when negotiating tight turns and sudden changes in direction.

Another key component of an F1 car is its _____ construction. The car is built using advanced materials such as carbon fiber composites, which allow for a lighter overall weight, improved stability and better acceleration. This is further aided by the use of high-performance tires, which are designed to provide maximum grip on the
25 track surface.

Finally, the driver of an F1 car is supported by a range of cutting-edge technology, including advanced telemetry systems, which provide real-time information

about the car's performance, as well as a complex network of _____ and electronics that help the driver to make split-second decisions on the track.

30 In conclusion, an F1 car is a highly sophisticated machine, engineered to perform at the highest levels of competition. Its combination of advanced power units, aerodynamics, lightweight construction, and cutting-edge technology make it a formidable competitor on the race track.

35 **Activity II. Read the following text about the F1 paddock and fill in the blanks with the appropriate words from the list below:**

teams, garages,

hospitality, paddock , media,

engineers, mechanics,

40 *drivers*

The Formula One (F1) paddock is a bustling area located behind the pit lane. It is where the _____, _____, and support staff of each team are based during a race weekend. The paddock is also home to various amenities, including _____ areas for teams and sponsors, a _____ club for VIP guests, and
45 facilities for the _____ to carry out interviews and report on the action.

In the paddock, each team has its own _____, where the cars are prepared for the race. The _____ work on the cars, making any necessary repairs and adjustments, while the _____ oversee the operation and make decisions about strategy. The cars are also refueled in the garages before being taken out onto the track.

50 During a race weekend, the paddock is a hub of activity, with _____ and team personnel constantly coming and going. Despite the busy atmosphere, the paddock is a highly organized and structured environment, with strict protocols in place to ensure the safe and efficient operation of the event.

Activity III. Read the following text about the greatest F1 drivers and fill in the blanks with the appropriate words from the list below:

championships, victories, pole positions,

skills, dominant, speed,

innovation, teamwork, dedication,

longevity

Formula One (F1) racing has produced some of the greatest drivers in the history of motorsports. These drivers have set records for the most _____ won, the most _____, and the most _____. They are known for their incredible _____, speed, and ability to perform under pressure.

One of the most dominant drivers in F1 history was Michael Schumacher, who won seven world championships and recorded 91 Grand Prix _____. Schumacher was known for his aggressive driving style, unrelenting _____, and ability to push the limits of the sport.

Another great driver was Ayrton Senna, who won three championships and recorded 41 Grand Prix wins. Senna was renowned for his raw _____ and ability to extract the maximum from his car. He was also a pioneer in terms of _____, constantly seeking new ways to improve the performance of his car and gain an edge on the competition.

Finally, Juan Manuel Fangio is widely regarded as one of the greatest F1 drivers of all time, having won five championships in the 1950s. Fangio's longevity and continued success over many years is a testament to his _____ and commitment to the sport.
