John decided to **clean up** his bedroom. He started by **picking up** his clothes from the floor and **putting them away** in the closet. Then, he **made up**  
5 his bed, carefully **straightening out** the sheets and **fluffing up** the pillows. He noticed some books scattered on the floor, so he **picked them up** and **put them back** on the shelf. Next, he **dusted off** his desk and **wiped down** the surfaces. After everything was  
10 in order, he decided to **lie down** for a few minutes to relax.

While he was lying down, John remembered he had a coding project to finish. He **got up**, **sat down** at his desk, and **booted up** his computer. He  
15 needed to **debug** a piece of code that had been causing issues in the system. After **looking through** the code for a while, he managed to **figure out** what was wrong. He **fixed up** the error and **ran** the

program again. Everything was working perfectly  
20 now.

Feeling accomplished, John decided to take a break. He **stood up, stretched out,** and then **walked over** to the kitchen to see what Maria was doing.

Maria walked into the kitchen to **whip up**  
25 some breakfast. She started by **taking out** the ingredients from the fridge. After gathering everything she needed, she **turned on** the stove and began to **heat up** the pan. She then **chopped up** some vegetables and **threw them in** the pan to sauté. While  
30 the vegetables were cooking, she **cracked open** a few eggs and **whisked them up**. Once the vegetables were ready, she **poured in** the eggs and **stirred them around** until they were fully cooked. After serving the food, she **cleaned up** the kitchen by **wiping down**  
35 the counters and **putting away** the dishes.

After breakfast, Maria sat down at her laptop in the kitchen. She was working on a new feature for a web application and needed to **write up** some new code. She **logged in** to her development environment

40 and started **typing out** the new function. It involved **setting up** a few new variables and **calling out** some API functions. She also had to **comment out** a few lines of the old code that were no longer needed.

Just as she was about to **run** the application  
45 to test the new feature, John walked in. "Hey, how's it going?" he asked.

"Great," Maria replied. "I just need to **test out** this new code."

John **pulled up** a chair and **sat down** next to  
50 her. "Mind if I **look over** it with you?"

"Of course not," Maria said, smiling. They both **went over** the code, making sure everything was correct. After a few tweaks, they **ran** the application and it worked perfectly.

55 "Awesome job!" John said, giving Maria a high-five.

"Thanks! Now, let's **shut down** our computers and **head out** for a walk. We deserve a break."

## 60 Bedroom

### 1. Clean up:

- **Definition:** To make a place clean and tidy.
- **Example:** "John decided to clean up his bedroom."

### 2. Pick up:

- 65
- **Definition:** To lift something from a surface.
  - **Example:** "He started by picking up his clothes from the floor."

### 3. Put away:

- **Definition:** To place something in its designated spot.
- **Example:** "Putting them away in the closet."

### 70 4. Make up:

- **Definition:** To arrange or organize something, especially a bed.
- **Example:** "He made up his bed."

### 5. Straighten out:

- 75
- **Definition:** To make something tidy or organized.
  - **Example:** "Carefully straightening out the sheets."

### 6. Fluff up:

- **Definition:** To shake or pat something to make it fluffier.
- **Example:** "Fluffing up the pillows."

### 7. Put back:

- 80
- **Definition:** To return something to its original place.
  - **Example:** "Put them back on the shelf."

### 8. Dust off:

- **Definition:** To remove dust from a surface.
- **Example:** "He dusted off his desk."

### 85 9. Wipe down:

- **Definition:** To clean a surface by rubbing it with a cloth.
- **Example:** "Wiped down the surfaces."

### 10. Lie down:

- 90
- **Definition:** To recline or rest on a surface.
  - **Example:** "He decided to lie down for a few minutes to relax."

### 11. Get up:

- **Definition:** To rise from a lying or sitting position.
- **Example:** "He got up, sat down at his desk."

### 12. Boot up:

- 95
- **Definition:** To start a computer.
  - **Example:** "Booted up his computer."
13. **Figure out:**
- **Definition:** To understand or solve something.
  - **Example:** "He managed to figure out what was wrong."
- 100 14. **Fix up:**
- **Definition:** To repair or improve something.
  - **Example:** "He fixed up the error."
15. **Stand up:**
- **Definition:** To rise to a standing position.
  - **Example:** "He stood up, stretched out."
- 105 16. **Stretch out:**
- **Definition:** To extend one's body to its full length.
  - **Example:** "Stretched out, and then walked over to the kitchen."

## Kitchen

- 110 1. **Whip up:**
- **Definition:** To prepare something, especially food, quickly.
  - **Example:** "Maria walked into the kitchen to whip up some breakfast."
2. **Take out:**
- **Definition:** To remove something from a place.
  - **Example:** "Taking out the ingredients from the fridge."
- 115 3. **Turn on:**
- **Definition:** To start the operation of a device.
  - **Example:** "She turned on the stove."
4. **Heat up:**
- **Definition:** To make something warm or hot.
  - **Example:** "Began to heat up the pan."
- 120 5. **Chop up:**
- **Definition:** To cut something into pieces.
  - **Example:** "She then chopped up some vegetables."
- 125 6. **Throw in:**
- **Definition:** To add something to a mixture.
  - **Example:** "Threw them in the pan to sauté."
7. **Crack open:**
- **Definition:** To open something, especially eggs.

- 130           • **Example:** "She cracked open a few eggs."
8. **Whisk up:**
- **Definition:** To beat or stir something quickly.
  - **Example:** "Whisked them up."
9. **Pour in:**
- 135           • **Definition:** To add a liquid to a container.
- **Example:** "Once the vegetables were ready, she poured in the eggs."
10.       **Stir around:**
- **Definition:** To mix ingredients by moving them around.
  - **Example:** "Stirred them around until they were fully cooked."
- 140       11.       **Clean up:**
- **Definition:** To make a place tidy.
  - **Example:** "She cleaned up the kitchen."
12.       **Wipe down:**
- **Definition:** To clean a surface with a cloth.
- 145           • **Example:** "Wiping down the counters."
13.       **Put away:**
- **Definition:** To place items in their designated spots.
  - **Example:** "Putting away the dishes."
14.       **Write up:**
- **Definition:** To create a written document.
- 150           • **Example:** "Needed to write up some new code."
15.       **Log in:**
- **Definition:** To access a computer system by entering credentials.
  - **Example:** "She logged in to her development environment."
- 155       16.       **Type out:**
- **Definition:** To write something by typing.
  - **Example:** "Started typing out the new function."
17.       **Set up:**
- **Definition:** To arrange or prepare something for use.
- 160           • **Example:** "Setting up a few new variables."
18.       **Call out:**
- **Definition:** To summon or request the execution of a function.
  - **Example:** "Calling out some API functions."
19.       **Comment out:**
- **Definition:** To disable a section of code by turning it into a comment.
- 165

20.       • **Example:** "Had to comment out a few lines of the old code."  
          **Run:**

          • **Definition:** To execute a program or application.

          • **Example:** "Just as she was about to run the application."

170       21.       **Pull up:**

          • **Definition:** To bring something closer.

          • **Example:** "John pulled up a chair."

22.       **Look over:**

          • **Definition:** To examine something carefully.

175       • **Example:** "Mind if I look over it with you?"

23.       **Shut down:**

          • **Definition:** To turn off a computer.

          • **Example:** "Let's shut down our computers."

24.       **Head out:**

180       • **Definition:** To leave a place.

          • **Example:** "Head out for a walk."
